

ADVANTAGES

- Micro fine glass media, with continuous glass filament separators formed into a single mini-pleat filter pack.
- 95% at 0.3µ to 99.9995% at Most Penetrating Particle Size (MPPS).

Application	Critical air quality applications such as those found in laboratories, R&D facilities, healthcare, or food and beverage processing.
Frame	Extruded anodized aluminium
Media	Glass fiber
Separator	Hot-melt
Sealant	Polyurethane
Max Temperature (°C)	93° C
Comment	Tested in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900.
